

Standard Football Netting | 120mm mesh | 2.5mm twine

PRICES ARE EX VAT | MPN: | BARCODE:

Football netting is one of our most popular ball retention products. It is used for ball retention for footballs/basketballs/rugby balls.

Each net is made to size and therefore, please allow up to 10 working days for this item to be dispatched. VAT and a standard delivery charge of £4.95 will be added to your order at the end of the checkout process.

Netting Construction

- The netting is manufactured from 15/24 HDPE ultra-violet stabilised twine.
- 120mm mesh size.
- Twine thickness is approximately 2.5mm in diameter.
- The breaking force of the twine is approx. 105kg.

What's This Netting Used For

- At the top of stands at Football stadiums
- Containment around Football training pitches
- Home use (around your garden for example)
- Perimeter netting around fields
- Wherever there is **not** constant high impact from Footballs. Please see Heavy Duty Football Netting for this
