

**Report to:** South London Waste Partnership (SLWP)  
Joint Waste Committee

**Date:** December 2018

**Report of:** SLWP Management Group

**Author(s):** Annie Baker, Strategic Partnership Manager

**Chair of the Meeting:** Councillor Brunt, Chair of SLWP Joint Waste Committee

**Report title:**

**Risk Report**

**Summary:**

This report summarises key risk areas which are facing the partnership boroughs in relation to the waste disposal functions of the Joint Waste Committee.

**Recommendations:**

Joint Waste Committee is asked to note the contents of this report.

**Background Documents:**

Confidential risk register is held by the Strategic Partnership Manager, Annie Baker.

## **1. BACKGROUND**

- 1.1.** This report summarises key risk areas for the waste management contracts overseen by the Joint Waste Committee, based on the South London Waste Partnership team's risk register. Previously a full register has been presented to the committee, this report summarises the key risks that should be noted at committee level. The full risk register is considered at the SLWP's Management Group and Strategic Steering Group.

## **2. KEY RISK AREAS**

- 2.1.** Areas have been included in this report where they are considered strategically important, for example because they are high scoring in terms of impact and/or likelihood, or have changed in score.

### **2.2. Recycling materials market changes**

Following significant changes to global recycling material markets over the last year (for example China's changed import requirements), the value of some recycling materials has decreased significantly. This has some impact on borough budgets (as some of our material generates income depending on the recycling's sale value) and also has an impact on our contractors as recycling income is built into the financial models of several of our waste management contracts. The impact of a worsening level of income for recycling will be managed through budget and contract management processes.

As a consequence of the market changes, reprocessors are becoming increasingly strict on the level of contamination they will accept in the recycling material. Material which is too contaminated requires further sorting if any of the material is to be recycled. Extra sorting increases the reprocessing costs for recycling and so some impact on budgets is expected, as above.

Action currently undertaken to protect the quality of our recycling:

- An increasingly harmonised approach to recycling across the SLWP area means that messages about what to recycle can be simple and effective across our whole region. All boroughs now follow broadly the same recycling regime.
- Material which doesn't meet the contamination thresholds is being sent to specialist sorting facilities where the recyclable material is extracted.
- The poorest quality material we collect typically comes from communal collection containers where it is difficult to identify who might be putting the wrong material in the wrong bin, which can make communications work hard to target; we're working with organisations and networks to look at what we can learn from others and what good practice we can share in this area.

- The communal containers are typically collected on separate collection rounds which protects all the other recycling material we collect from unnecessary contamination.
- We're closely monitoring the quality of the materials being collected for recycling and the processes being followed to manage contamination.

Further planned activity to reduce contamination:

- We're looking at how we can best use and target our communications activities to further reduce contamination. This will form a part of our next communications plan.

### **2.3. Impact of recycling value changes on our contracts**

Financial issues within contracts can have significant impacts on contract performance, likelihood of contract disputes and ultimately contracts cannot operate unless they are financially sustainable. Pressures such as the current global recycling market must be carefully considered when we formulate our approach to procurement of contracts and services. The changes and unpredictability of the recycling markets, which affects all our contracts, mean that this is a key focus for us at the present time

## **3. RECOMMENDATIONS**

- 3.1.** It is recommended that the Joint Waste Committee note the contents of this report.

## **4. IMPACTS AND IMPLICATIONS**

### **4.1. Legal**

There are no legal considerations arising directly from the recommendation in this report

### **4.2. Finance**

There are no financial considerations arising directly from the recommendation in this report
