## **HARTFIELD WALK - WIMBLEDON**

*Creating a vibrant, educational and engaging space for all ages in the heart of Wimbledon town center. Hartfield Walk offers a chance to reimagine what small underused spaces can do for our environment and our communities. Whether it is to sit and enjoy a coffee first thing in the morning, read a book in the afternoon sunshine, grab a bite for lunch or while away the evening, Hartfield Walk offers a sense of escapism.*

*This is a space to escape the hustle and bustle of the busy shopping area. It is a place to meet and connect with friends and family, a space to play and spend time and a space that takes you on an educational journey. It is a place to escape for a respite and to breathe easier whilst learning about the environment. It is a space for the local community to engage with, be proud of and leave their mark upon. It is a tool to enhance and protect the local environment with the focus on creating a safe, healthy and environmentally considerate haven for the local community.*

## Approach

### *A Journey of Escapism*

Taking inspiration from urban parks and tactical urbanism, Hartfield Walk is about the journey. Reclaiming an underused space and repurposing it for the local community. It is a non-linear space interspersed with engaging and educational components designed to improve health, well-being and the environment. Manhattan's High Line is a prime example of the success of this approach.

<https://www.thehighline.org/about/>

We can take learnings from projects like the High Line and implement on a scale to fit with our local community. What makes Hartfield Walk unique is that we are approaching this project with a purpose to educate, inform and engage.

# Purpose

## *Air Pollution and Climate Change*

We are all aware of the impact of climate change and air pollution, especially in our urbanised towns and cities. Particulates in the air from traffic and industry can cause health issues and lasting damage to our environment.

We want Hartfield Walk to be a place to educate, inform and engage the local community, To combat air pollution and climate change and inspire local people of all ages to make a difference. Each component that makes up the space is carefully considered and has an educational purpose. Whether this is through art, play, plants and greenery, the materials used, how the lights are powered or what coffee is served. It is all done so with this purpose.

Help reverse climate change before it's too late.

# The Plan

- |    |   |     |  |
|----|---|-----|--|
| 1. | Green Entrance Arch                     | 10. | Festoon Lighting                       |
| 2. | Air Pollution - Community Mural         | 11. | Climate Change - Large Community Mural |
| 3. | Medium Bench and Planter                | 12. | Cycle Park - Climate Link              |
| 4. | Tree Bench                              | 14. | Green Entrance Totem                   |
| 5. | Waste Bin                               | 15. | Small Bench and Planter                |
| 6. | Floor Art Maze - Tackling Air Pollution |     |  |
| 7. | Floor Art - Environmental Hopscotch     |     |  |
| 8. | Qty 4 of 3m x 2.2m Ethical Kiosks       |     |  |
| 9. | Large Bench and Planter                 |     |  |

# Ethical Kiosk

W2400 x L2840mm x H3200mm

There are two blocks kiosks, each block containing two mirror image units (2.4m x 2.8m). Each unit will have a stainless steel worktop and space for a fridge.

Constructed from OSB with sustainably sourced oak for glazing. The roof structure will be a sedum living roof.

Pitched roof has two sides with current dimensions as shown for each pitch. We have the ability to increase depth of roof by a maximum of 2 inches (50mm) if necessary and without severe modification to structure.

Living Roof to consist of air purifying plants.  
Planting Area: 7.59sqm per Kiosk Roof

*N.B Colour palette to be confirmed.*
